Client Game Analysis

This document contains legally privileged and confidential information and is intended only for the exclusive use of the addressee and those to whom the addressee permits. If you are not the intended recipient of this document, you are hereby notified that any dissemination, distribution or copying of this document is strictly prohibited. If you have received this document in error, please notify Sum It Golf Services Limited by e-mail, fax or telephone and return the original document to us at our company address. We will reimburse any costs you incur in notifying us and returning the document. Thank you.

Certain areas of the player's golf may not be analysed in this report.

We strongly advise players not to think about golf statistics whilst on course.

If the player or support team / coaches require any further information then please contact us.

Report Settings

| | |
|------------------------------------|---|
| At the time of this report: | 100th on the Official World Golf Rankings. 100th on the 2012 Race to Dubai Order of Merit. 100th on the 2012 European Tour Stroke Average Rankings. |
| Our analysis is based on: | 27 Competitive Rounds. |
| Between the dates of: | 01 September 2011 to 01 January 2012. |
| Rounds missing: | None (match play stats are not required). |
| Last report date: | N/A, this is the first report. |

Summary Statistics

| | |
|-------------------------------|--|
| Stroke Average: | 70.48 (1.52 shots under Par per round) |
| Average Course Length: | 6,682 metres |
| Average Course Par: | 72.0 |
| Par 3 Stroke Average: | 3.08 on holes averaging 187 metres in length (better than the tour average). |
| Par 4 Stroke Average: | 3.96 on holes averaging 385 metres in length (very good). |
| Par 5 Stroke Average: | 4.63 on holes averaging 521 metres in length (very good). |

Off The Tee

(Fairways Hit together with misses that finish in the Semi Rough are counted as tee shot success because players are nearly as accurate with approach shots from the semi rough as they are from the fairway)

| | |
|--------------------------------|--|
| Driver: | Fairways: 50.7% Semi Rough: 15.2% Comments: The tendency for misses is left of target. |
| 3 Wood: | Fairways Hit: 60.1% Semi Rough: 11.1% Comments: None. |
| 5 Wood: | Fairways Hit: 62.5% Semi Rough: 8.3% Comments: We would expect the 5 Wood to be slightly more accurate. The tendency for misses is slightly right of target. |
| 3 Iron | Fairways Hit: 79.2% Semi Rough: 12.5% Comments: Good. |
| 4 Iron | Fairways Hit: 91.7% Semi Rough: 8.3% Comments: Good. |
| All Clubs: | Fairways Hit: 55.7% Semi Rough: 14.0% Comments: The tendency for misses is slightly left of target. |
| Par 4 Driving Accuracy: | Fairways Hit: 57.2% Semi Rough: 12.9% Comments: None. |
| Par 5 Driving Accuracy: | Fairways Hit: 51.9% Semi Rough: 16.7% Comments: None. |

Approach Play

| | |
|------------------------|---|
| Woods: | Performing close to tour average. |
| 3 Iron | Greens Hit: 26.7% Comments: Slightly lower than we would expect. The tendency for misses is short / right of target. |
| 4 Iron | Greens Hit: 40.6% Comments: The tendency for misses is slightly short of target. |
| 5 Iron | Greens Hit: 45.2% Comments: Slightly lower than we would expect. The tendency for misses is short / left of target. |
| 6 Iron | Greens Hit: 61.7% Comments: Good. |
| 7 Iron | Greens Hit: 69.0% Comments: Good. |
| 8 Iron | Greens Hit: 72.7% Comments: Good accuracy, but Up and Down Success could be better, a few too many shots finish outside 9 metres from the hole. The tendency for misses is short / left of target. |
| 9 Iron | Greens Hit: 76.1% Comments: Good accuracy. The tendency for misses is short / left of target. |
| Pitching Wedge: | Greens Hit: 77.2% Comments: Good accuracy, but Up and Down Success could be better, a few too many shots finish outside 4.6 metres from the hole. |
| Sand Wedge: | Greens Hit: 82.6% Comments: Good accuracy, with a good number of shots finishing within 4.6 metres of the hole, and good Up and Down Success (30.4%). |
| Lob Wedge: | Greens Hit: 84.9% Comments: Good accuracy, with a good number of shots |

| | |
|----------------------|---|
| | finishing within 4.6 metres of the hole, and good Up and Down Success (32.9%). |
| All Clubs: | Greens Hit: 63.6% Comments: Approach shots that hit the green finish on average 6.1 metres from the hole. You are achieving an Up and Down Success of 17.2% with 5.5% of misses finishing on the Fringe. |
| Hole Scoring: | The last six holes of the round are generally the strongest and reactions to bogies are very good, which is a great sign. |

Short Game

| | |
|----------------------|---|
| Fringe Shots: | World class. |
| Chip Shots: | Performing very well. |
| Lob Shots: | Excellent Up and Down statistics. |
| Bunker Shots: | You are going in 1.67 greenside bunkers per round which is slightly more than the tour average. When playing from the greenside bunkers your results are just below tour average. |
| Overall: | Performing very well, although the leading players achieve slightly better Up and Down Success than you, due to mid-range putting, not the short game. |

Putting

| | |
|---|--|
| Short Range (0 to 6 ft / 0 to 1.8 m): | Very good. |
| Mid Range (6 to 15 ft / 1.8 to 4.6 m): | Just below tour average. |
| Long Range (15 + ft / 4.6 + m): | Putt conversions from 4.6 metres to 9.1 metres are just below tour average, putt conversions from outside 9.1 metres are fine. |

Our Summary and Recommendations

General Comments:

The data entered so far includes a great victory at the Example Tournament, a tied 3rd in Other Tournament and six solid cut making finishes (between 29th and 65th). European Tour career statistics show you have now won twice on the European Tour with 15 top 10's and 91 cuts made from 145 starts. You have also won three times on the Challenge Tour from 45 starts (2006 to 2008). Your career is certainly progressing in the right direction.

To take your golf game to the next level, the aim is to increase the number of times you are contending and to add more top 10 finishes, which will help you to further climb the world rankings.

Off The Tee Knock On Effects:

On the surface of your game it appears as though you are hitting fewer fairways in 2012. But looking deeper we can see that 14.0% of the misses are in the semi rough, which means you are getting the ball in play. Fairways Hit together with misses that finish in the Semi Rough are counted as tee shot success because players are nearly as accurate with approach shots from the semi rough as they are from the fairway.

Understanding the knock-on effect from tee shots for a player of your type is important. You and your coach should know that the more accurate you become from the tee, the more accurate you should become with your approach play. Hitting more shots from the fairway and semi rough will give you better distance and direction control, and you should even go in less greenside bunkers (the best way to improve your bunker play is to reduce the number of bunkers you go in).

Par 4 / Par 5 Driving Accuracy:

We continue to monitor the difference between your Par 4 and Par 5 Driving Accuracy. It is common for tour players to be slightly less accurate from the tee on Par 5 holes, even with Driver only analysis. As agreed this is not a major concern but we would not like to see the difference get wider. We usually encourage our tour clients to strive for consistency rather than gaining the extra 10 yards on the Par 5's.

5 Wood:

Over the coming months you would benefit from doing some extra work with the 5 Wood off of tee pegs. Perhaps in training sessions, hit 10 shots with the 5 Wood from a tee using the "Driving Accuracy Game by Dr. Karl Morris" (see "Practice and Drills" below in this report). The 5 Wood should reach accuracy levels of 70% to fall in line with other clubs.

Check Your Shot Distances:

Because the tendency with the longer irons is slightly short of target, we recommend checking and confirming the distances that you hit your long irons. This is a very simple process that you can work through at home or with your caddy, and it can make a very positive difference.

We also recommend checking and confirming the distances that you hit your 8 iron and pitching wedge.

Check 5 Iron Set-Up:

We recommend having the set-up of your 5 iron checked just in-case it has a defect. We would normally expect the accuracy of this club to be somewhere between 50% and 60%, rather than the 45.2% in this report.

Practice and Drills Recommendations

Approach Shot Drill by StrokeAverage.com

Practice the following 150 yards and in drill. Get a helper to pace out onto the practice ground and call out the distance they are standing away from you, e.g. 75 yards. Try to pitch balls at their distance so they can give you instant feedback on the yardage you **land** the ball (i.e. 2 yards short or 4 yards long). This will allow you to immediately adjust your hitting which is great for gaining feel. Make sure the helper changes distance every 6 shots or so to test you.

Driving Accuracy Game by Dr. Karl Morris

Create a range area 25 yards wide. Hit 10 drives with a 30 second gap in between each shot and see how many finish within your marked area. If you manage 7 out of 10 then move the range into 20 yards. Repeat the exercise. When you score 7 out of 10 again, move the range into 15 yards... and so on. This game has pressure, difficulty and scorekeeping - three elements of successful practice. It also stops you blazing away at 30 or 40 balls without stopping to think. Do not hit more than 30 drives in any one session.

Client Comments
